

1

John King gets into his autonomous car. The car audibly greets him and asks where he'd like to go.

2

The vehicle displays and announces the four closest coffee shops. The results are displayed on the windshield and a touchscreen in the center console. The voice notifies John which listing he most recently went to.

3

John verbally instructs his car that he would for the car to navigate to Espresso Royale.

4

On the windshield, the vehicle renders the route it will take and displays the current speed, distance from destination, and estimated time of arrival for the passenger to see. The console touchscreen displays the destination.

5

John leans his seat back to relax and plays a game on his phone while the car steers itself and navigates to Espresso Royale coffee shop.
